MASTERING AUTO LAYOUT

Part 4: Constraints in Code

UILayoutGuide

Name

Address

UIViewLayoutGuide
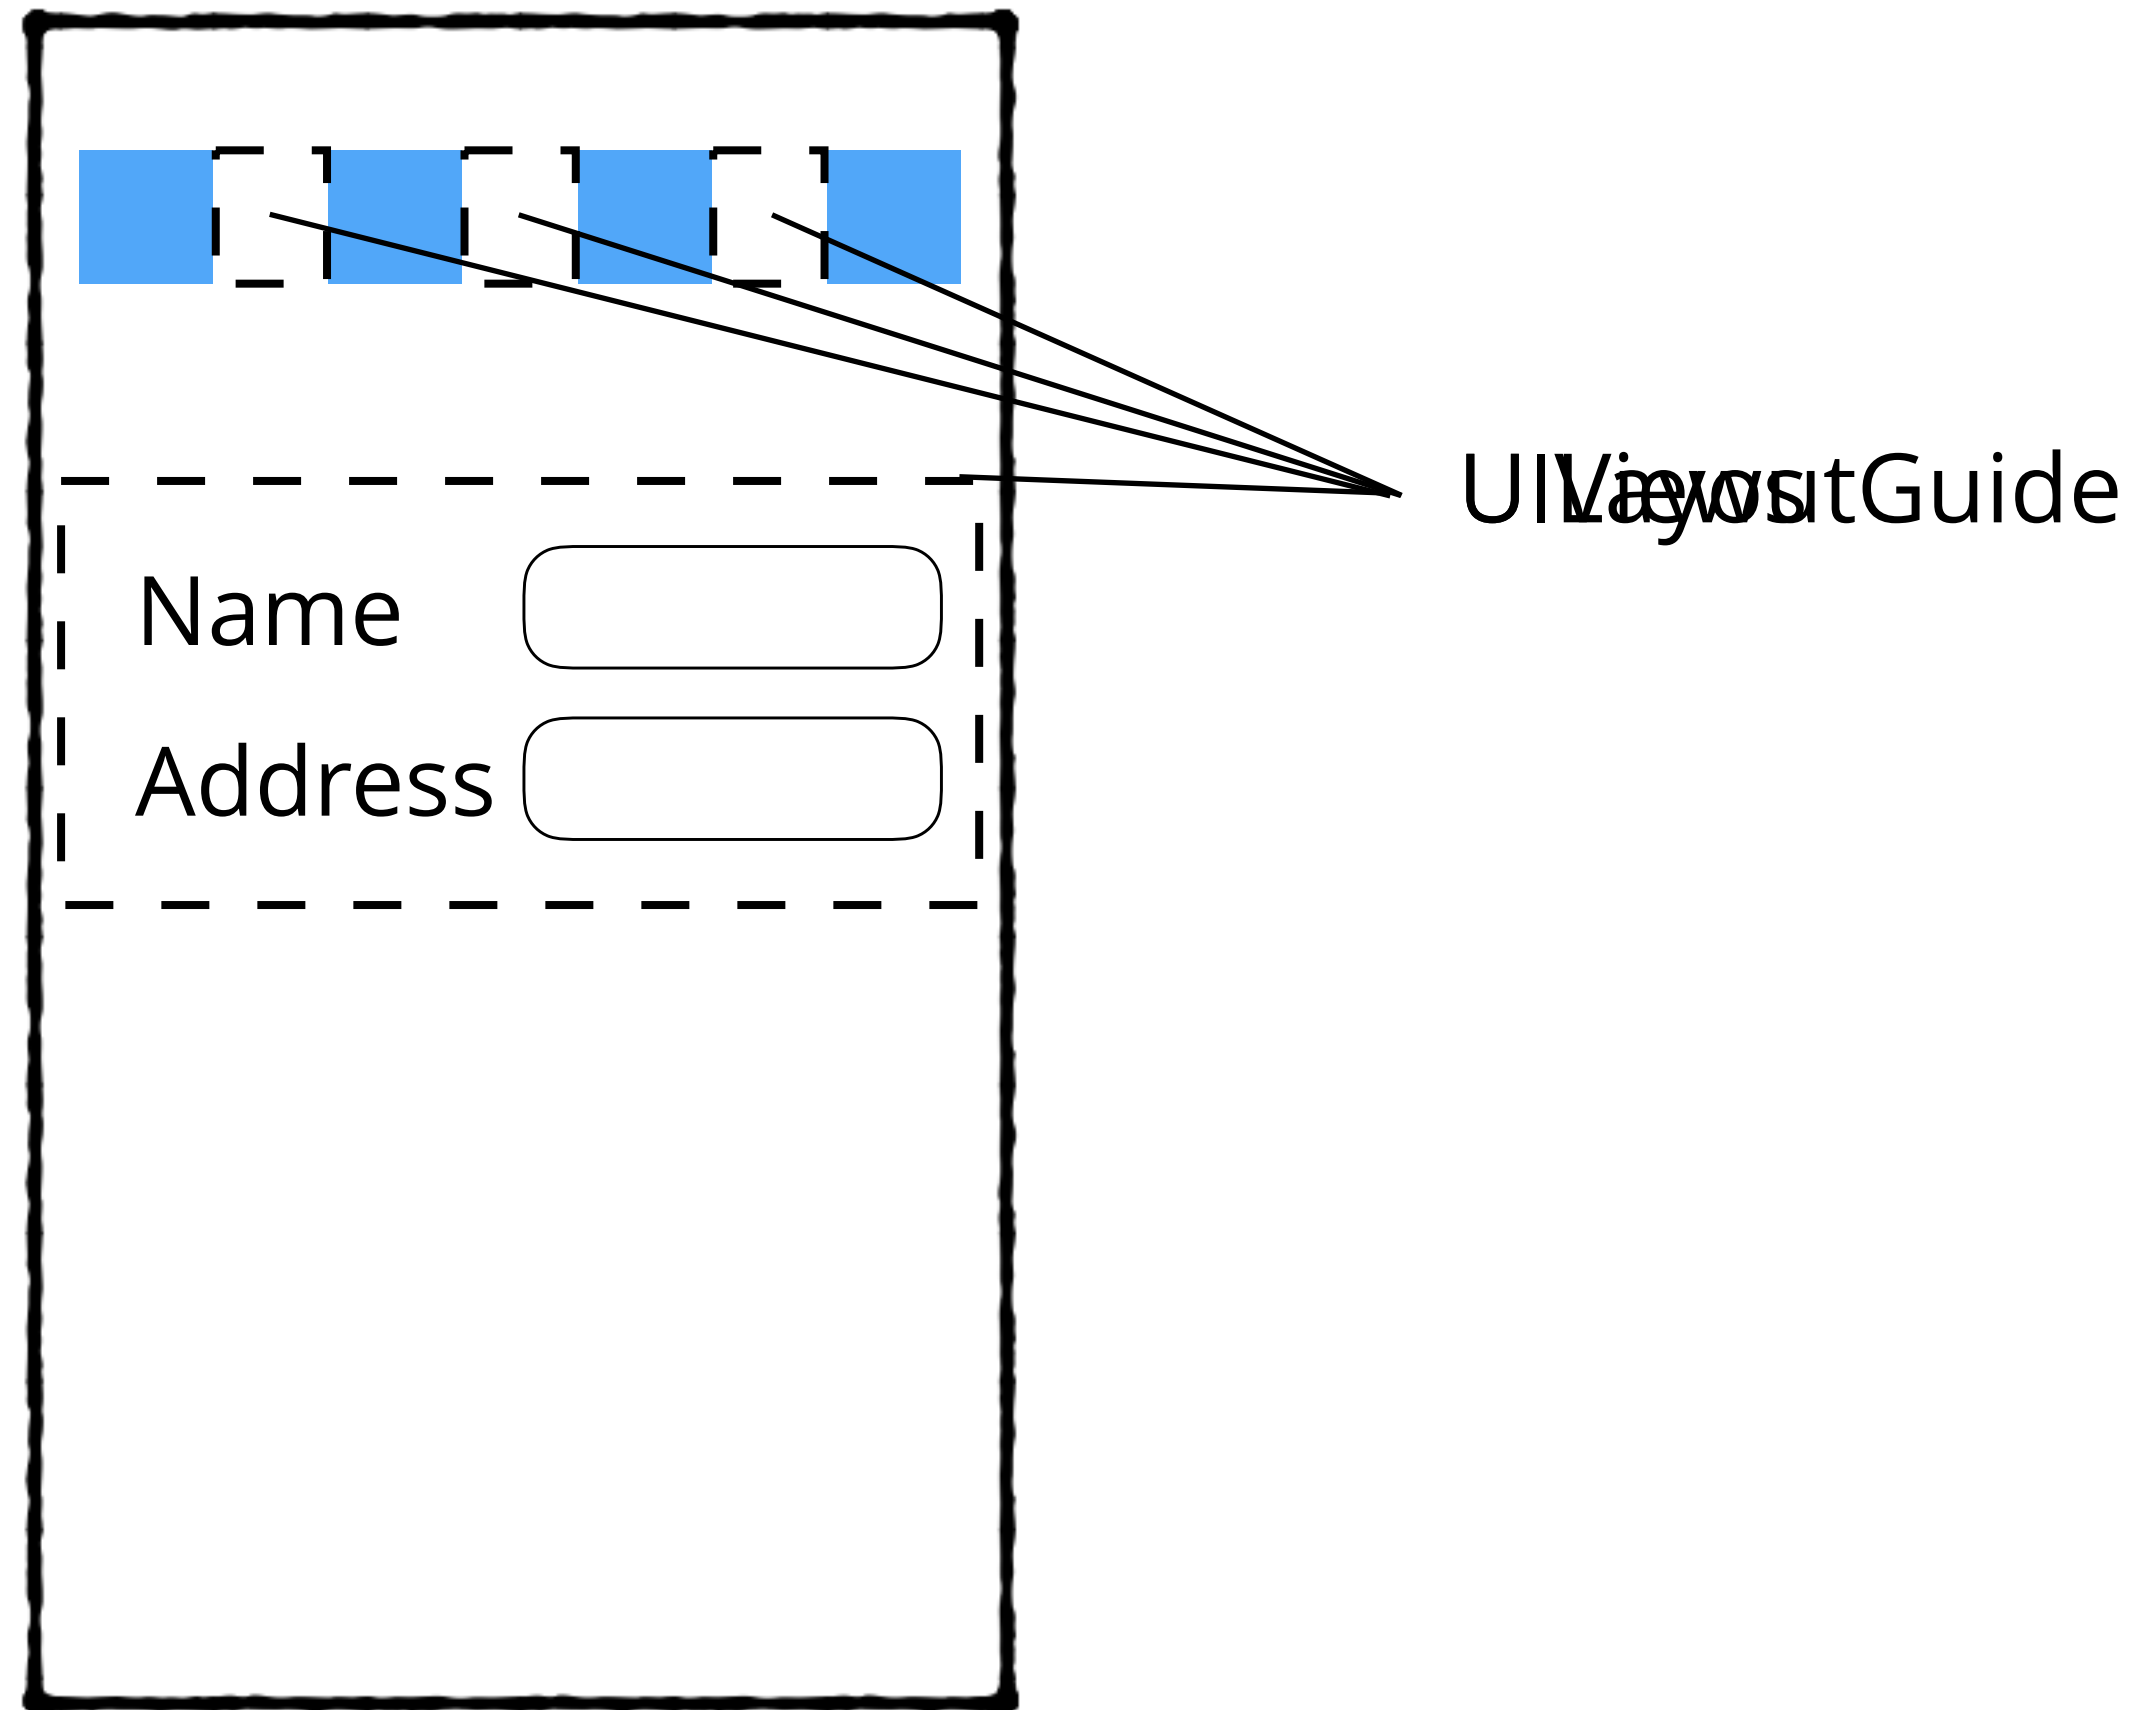

NSLayoutAnchor

view2.leadingAnchor.constraint(equalTo: view1.trailingAnchor).isActive = true
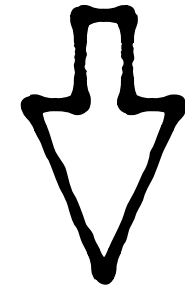

Autoresizing Masks

```swift
let label = UILabel()
label.translatesAutoresizingMaskIntoConstraints = false
label.text = "Hello"
view.addSubview(label)
// ... constraints added manually ...
```
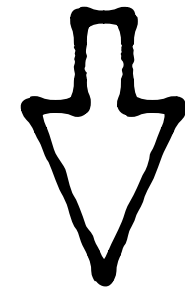

View Lifecycle

View loaded from storyboard

⇩

viewDidLoad()

⇩

views sized for display

⇩

viewDidLayoutSubviews()
